Subject: 2021 Pavement Management Program

Dear Property Owner:

On April 27, 2020, the Arden Hills City Council authorized a feasibility study for potential street and utility improvements in your neighborhood. The project is being considered for the 2021 construction season. The study area includes Prior, Glenpaul, Edgewater and Jerrold Avenue as well as the eastern portion of Lake Valentine Road as shown on the attached map.

The feasibility study will evaluate the extent and costs for replacement or repairs to street pavement, water main, sanitary sewers and stormwater drainage infrastructure. During this evaluation process, City staff requests that residents within the study area complete the enclosed survey form to assist with determining needed improvements within your neighborhood.

Residents within the project area are encouraged to visit the City's website to review additional study information as described on the back of this page. Due to challenges related to COVID-19, staff will be posting a recorded presentation describing project details by May 18, 2020 in lieu of holding a public open house meeting. Residents can contact city engineering staff by email or phone with any questions or comments related to potential street and utility improvements.

After completing the feasibility report, staff will mail you additional information describing the schedule and future steps for recommended improvements within the 2021 Pavement Management Program project area.

The City of Arden Hills would like to thank you in advance for your patience and cooperation with this process. Please complete and return the enclosed survey form by June 3, 2020. If you have any questions or comments, please contact David Swearingen at 651-792-7847 or email dswearingen@cityofardenhills.org.

Sincerely,

CITY OF ARDEN HILLS

Todd Blomstrom, P.E.
Public Works Director / City Engineer
